

Pablo Pérez García

SysAdmin | Windows & Cloud
Infrastructure | Virtualization and
Monitoring

Systems administrator with experience in Microsoft environments: identity management using Active Directory and Entra ID, device management using Intune, virtualization (Proxmox, VMware), and on-premises-to-cloud migrations (Azure). Experience in infrastructure monitoring and perimeter security foundations. Focused on the administration and continuous improvement of IT infrastructures.

TECHNICAL SKILLS

- **Systems:** Windows Server, Linux (Ubuntu, Debian and Suse), Active Directory
- **Cloud:** Microsoft Azure, Entra ID (Azure AD), Microsoft Intune. On-Premise to Cloud migrations
- **Network and monitoring:** WatchGuard, pfSense, IDS/IPS (Snort), Nagios, Zabbix, Cibersecurity frameworks fundamentals
- **Virtualization:** VMware & Proxmox
- **ITSM:** Jira & Helix ITSM
- **Scripting:** Powershell & Bash

WORK EXPERIENCE

IT Support

Cartronic Group
Dec 2025 - Present

At this company, I hold dual responsibilities: IT infrastructure and SAP management/development. In addition, I contribute to VigiaCAre, a comprehensive telemedicine platform (civilian and military).

IT Infrastructure:

- Active Directory administration (50+ users), WatchGuard firewall, switches/routers, video surveillance, virtualization (Proxmox, VMware), and monitoring (Nagios, Zabbix).

SAP/HANA:

- Responsible for on-premise SAP/HANA management: coordination with consulting partners, queries and reports, layout design (Crystal Reports), HANA procedures, process automation through C# development (HANA integration, document generation, automatic email sending), system integration (APIs, Postman), and intranet architecture.

VigiaCAre (Telemedicine):

- Preparation of telemedicine kits, medical inventory management, development testing (civilian and military). Translated with DeepL.com (free version)

Remote Technical Support Operator

Movistar Prosegur Alarmas
Feb 2017 - Dec 2025

Technical Call Center Agent (Alarms and Video Surveillance):

- Remote management of technical issues in security and video surveillance systems.
- System monitoring using specialized tools.
- Use of Salesforce CRM for incident management. Escalation of incidents via JIRA.
- Technical support for installers and field technicians.

IT Support (Internship)

Prosegur Activa
Apr 2025 - Jul 2025

- Supported migration from on-prem Active Directory environments to cloud identity management with Microsoft Entra ID.
- Provisioned and configured endpoints using PXE deployment and Intune device management.
- Managed endpoint policies, compliance, and identity access controls.
- Delivered first-line IT support while tracking incidents via Helix ITSM.

CERTIFICATIONS

IFCT0410 — Network Administration and Design

Official Vocational Certificate (Spain) · LideraK Formación

Jun 2025 - Dec 2025

IFCT095PO — Python and Django Development Foundations

Specialisation Certificate (Spain) · Campo Grande Formación

Sep 2025 - Nov 2025

ADDITIONAL TRAINING

ISO 27000 Foundations

LinkedIn Learning

Dec 2025

Linux – Foundations training in Linux systems administration.

OpenWebinars

WORK EXPERIENCE

Data Center Operations Technician

Tata Consultancy Services

Nov 2016 - Jan 2017

- Delivered first-line operational support in a Tier data center environment.
- Monitored server hardware alerts and ensured compliance with operational procedures.
- Supported rack-level interventions and cross-team coordination during maintenance activities.
- Executed backup media handling and RAID-related maintenance routines.

PROYECTS

Script bash backup Ubuntu-Windows

Jan 2026

- Designed and implemented a cross-platform backup solution using Bash scripting, integrating Linux and Windows environments.
- Automated secure data transfer via SMB and FTP, maintaining versioned single-copy backups.
- Streamlined backup operations, improving reliability and reducing manual errors..

Designing a Segmented Network Infrastructure for SMEs” (Final Degree Project)

Sep 2025 - Dec 2025

- Built a multi-VM lab environment for security testing, including pfSense firewall, Ubuntu and Windows servers, and client systems.
- Deployed Snort IDS for real-time traffic analysis and intrusion detection.
- Implemented Nagios Core monitoring for proactive alerting of critical system services.
- Performed log analysis and network event review to detect anomalies and simulate incident response scenarios.

Proxmox Virtualization Environment with Ubuntu and Nagios

Dec 2025 - Jan 2026

- Set up a virtualized environment using Proxmox VE for multi-server deployment.
- Installed and configured Ubuntu Server with Nagios Core for proactive system and network monitoring.
- Managed SNMP-enabled network devices and monitored domain controllers, improving operational visibility.

PROYECTS

Monitoring and Security Home Lab

Dec 2025 - Jan 2026

- Designed a home lab to simulate security incidents and analyze network events.
- Implemented a monitoring stack using Grafana and Prometheus within Docker containers.
- Conducted basic threat detection exercises and log analysis in a controlled environment.
