

Pablo Pérez García

IT Technician & SAP Developer |
Infrastructure & SAP HANA Support

Higher Technical Degree in Computer Systems and Network Administration (Spanish EQF Level 5, final grade 8.37/10), with 9 years of career experience in the electronic security sector at Movistar Prosegur Alarmas, where I combined my operational role in the Remote Technical Service with an acknowledged IT go-to role within the shift team. In 2025 I completed an N1-N2 IT Support internship at Prosegur Activa (Helix ITSM, ~250-user corporate environment, on-premise AD to Entra ID migration with Intune). Since December 2025 I have been working at Cartronic Group as IT Technician and SAP B1/HANA Developer, with responsibilities across Active Directory, Microsoft 365, virtualization, monitoring (Zabbix, Nagios) and process automation. Accredited English B2.

TECHNICAL SKILLS

- **Systems:** Windows Server, Linux (Ubuntu, Debian and Suse), Active Directory
- **Cloud:** Microsoft Azure, Entra ID (Azure AD), Microsoft Intune. On-Premise to Cloud migrations
- **Network and monitoring:** WatchGuard, pfSense, IDS/IPS (Snort), Nagios, Zabbix, Cibersecurity frameworks fundamentals
- **Virtualization:** VMware & Proxmox
- **ITSM:** Jira & Helix ITSM
- **Scripting:** Powershell & Bash

CERTIFICATIONS

Completed

- *Departmental Network Administration & Design* (600h · IFCT0410 · LideraK)
- *OT Cybersecurity — Advanced* (120h · IFCT0050 · Grupo Hedima)
- *Python and Django* (40h · IFCT095PO · Campo Grande)
- *ISO 27000 — Information Security Standards* — LinkedIn Learning

In preparation

- *AZ-900 — Microsoft Azure Fundamentals* (base for SC-200)
- *BTL1 — Blue Team Level 1* (Q3 2026)
- *SC-200 — Microsoft Security Operations Analyst* (Q4 2026)

EDUCATION

System Administrator - Higher Level

Vocational Training (EQF Level 5)

ILERNA Online - Final grade 8.37/10

Sep 2023 - Feb 2026

LANGUAGES

English - B2 (CEFR)

Spanish (Native)

WORK EXPERIENCE

IT Support Technician & SAP B1/HANA Developer

Cartronic Group

Dec 2025 - Present

Dual responsibility over internal IT infrastructure and the SAP B1/HANA environment, with additional participation in VigiaCare (telemedicine platform for civil and military environments).

IT Infrastructure:

- Administration of Active Directory (50+ users), Microsoft 365 and Google Workspace; N1-N2 support to internal users.
- **Networking:** console-based administration of managed switches (Planet Technologies) — VLANs, port security with MAC sticky, port hardening. Deployment of an optical fibre ring topology with RSTP and WAN uplink for a public-sector water infrastructure operator. Support to a Cisco → Meraki switching migration for a US healthcare multinational. Configuration of Teltonika routers.
- **Perimeter security and monitoring:** WatchGuard firewall management (rules, VPN, network segmentation); monitoring of critical services with Nagios and Zabbix.
- Virtualization with Proxmox and VMware; service deployment on Docker containers.

SAP B1 / HANA:

- On-premise management of the SAP B1/HANA environment in coordination with an external consulting partner: SQL queries, procedures, layouts in Crystal Reports.
- REST service testing and integration with Postman.
- Functional extension of an existing invoicing automation: analysis of the original .NET component (dotPeek) and adaptation of the document generation and automated email delivery logic.

VigiaCare (B2G telemedicine): deployment and validation of the IT equipment of the medical kit; integration testing across civil and military environments.

PROYECTS

Script bash backup Ubuntu-Windows

Jan 2026

- Designed and implemented a cross-platform backup solution using Bash scripting, integrating Linux and Windows environments.
- Automated secure data transfer via SMB and FTP, maintaining versioned single-copy backups.
- Streamlined backup operations, improving reliability and reducing manual errors..

Designing a Segmented Network Infrastructure for SMEs” (Final Degree Project)

Sep 2025 - Dec 2025

- Built a multi-VM lab environment for security testing, including pfSense firewall, Ubuntu and Windows servers, and client systems.
- Deployed Snort IDS for real-time traffic analysis and intrusion detection.
- Implemented Nagios Core monitoring for proactive alerting of critical system services.
- Performed log analysis and network event review to detect anomalies and simulate incident response scenarios.

Proxmox Virtualization Environment with Ubuntu and Nagios

Dec 2025 - Jan 2026

- Set up a virtualized environment using Proxmox VE for multi-server deployment.
- Installed and configured Ubuntu Server with Nagios Core for proactive system and network monitoring.
- Managed SNMP-enabled network devices and monitored domain controllers, improving operational visibility.

Monitoring and Security Home Lab

Dec 2025 - Jan 2026

- Designed a home lab to simulate security incidents and analyze network events.
- Implemented a monitoring stack using Grafana and Prometheus within Docker containers.
- Conducted basic threat detection exercises and log analysis in a controlled environment.

WORK EXPERIENCE

Remote Technical Service Operator and Shift IT Go-To

Movistar Prosegur Alarmas

Feb 2017 - Dec 2025

- Remote technical support to B2B and B2C customers of alarm and video surveillance systems in 24/7 continuous service:
 - Management and resolution of incidents on alarm panels, IP cameras and DVRs: WiFi configuration, DNS adjustments, IP addressing, connectivity troubleshooting.
 - Support on the use of client-facing applications (mobile app, web platform).
 - End-to-end ticket management in Salesforce CRM under SLAs with monthly performance-based incentives.
 - Multilingual customer support (Spanish and English) to national and international clients.
 - Structured escalation via Jira to specialised teams.

Acknowledged technical role within the shift:

- Shift IT go-to for a team of ~50 colleagues, with daily resolution of incidents on networking, office productivity, Salesforce and end-user computing. Supervisors would actively route technical queries to this position.
- Developed a Python-based automated KPI report on Salesforce, adopted by the team as its standard tracking tool.

IT Support (Internship)

Prosegur Activa

Apr 2025 - Jul 2025

- N1-N2 support to a corporate environment of approximately 250 users (CRA, STR, administrative staff).
- Ticket management in Helix ITSM with full autonomy from the second fortnight of the internship.
- Endpoint imaging and deployment via PXE within the corporate on-premise → cloud migration (Windows Server AD → Azure AD).
- Identity, device and GPO management through Active Directory, Entra ID and Microsoft Intune.
- Remote support with Quick Assist; resolution of incidents on office productivity and business software.
- Specific contribution as former STR operator: identification of recurring incidents in business operational software and transfer of resolution procedures to the support team.

Data Center Operations Technician

Tata Consultancy Services

Nov 2016 - Jan 2017

Data Centre operations at Telefónica's site.

- Management and resolution of incidents from clients and technicians.
- Processing of visits and escorting of client technicians to the requested racks.
- Daily routines: alarm review, server-room inspection, RAID tape changes.
